

Looking for a job?

With SimpleXX to your dream job - your path to success!

Cell Systems Engineer (Verification) (m/f/d) for Aviation

Start as a Cell Systems Engineer (Verification) with us into a joint and successful future. As a specialist and personnel supplier for the aerospace industry for decades and in partnership with renowned companies in the aviation industry as well as aviation pioneers, SimpleXX GmbH is looking for a Cell Systems Engineer (Verification) for the Weßling site at the next possible date within the framework of temporary employment with a takeover option. You will develop validation and verification plans and evaluate test results. Furthermore, you will support qualification / certification tasks and partake in Means of Compliance development. Working for our client as an aviation company, you can expect challenging activities in an innovative working environment that is future-proof and offers you excellent career opportunities. Do you have a high level of self-motivation and the corresponding commitment? Does this appeal to you? Then apply for our job offer today. We look forward to receiving your application!

The following tasks await you:

- Develop validation and verification plans, evaluate test results
- Support qualification / certification tasks and Means of Compliance development
- Collaborate with other teams regarding design, requirements and function of battery cell
- Define, elaborate, validate and verify component requirements
- Define project scope with suppliers and create Statement of Works
- Perform trade studies and lead decision making activities
- Take part in international working groups and committees to shape future regulations
- Develop necessary methods, tools and processes
- Work on any ad-hoc tasks or projects

Your profile:

- A University degree in Engineering, Electrochemistry, Material Science or related field
- 3+ years of experience in Li-ion battery technology required
- Experience in cell safety and performance testing and design of experiments required
- Knowledge of cell and preferably aerospace related standards, as well as data analysis and data management
- Experience with aerospace regulations and certification, as well as systems engineering, requirements management and/or reliability engineering
- Knowledge of materials and cell design is a plus
- Experience with a cell development project from start to finish is a plus
- Established network with cell suppliers and/or research institutions is a plus
- Target-oriented, driven workstyle with analytic problem-solving skills
- Proactive and demonstrating ownership; willing to lead key efforts and drive to closure
- Comfortable with complex situations with many unknowns, and creating clarity
- Fluent English language skills are essential, fluent German or any other language would be beneficial
- **Working on-site** (remote work possible) **and submission of English resume required**
