

Looking for a job?

With SimpleXX to your dream job - your path to success!

Electrician - Test Operations (f/m/d) for Aviation

Start as Electrician - Test Operations (f/m/d) with us into a joint and successful future. As a specialist and personnel supplier for the aerospace industry for decades and in partnership with renowned companies in the aviation industry as well as aviation pioneers, SimpleXX GmbH is looking for an Electrician for the Weßling site at the next possible date within the framework of temporary employment with a takeover option. As an Electrical Technician in the Test Operations team, you will play a pivotal role in ensuring the success of the innovative technology. Working for our client as an aviation company, you can expect challenging activities in an innovative working environment that is future-proof and offers you excellent career opportunities. Do you have a high level of self-motivation and the corresponding commitment? Does this appeal to you? Then apply for our job offer today. We look forward to receiving your application!

The following tasks await you:

- You will contribute your knowledge, expertise, and professional experience to ensure that the regulatory requirements for the design of switchgear for mechanical and electrical test benches up to 1 kV (AC & DC) are met based on applicable electrical and safety technical standards. This includes the analysis and specification of electrical safety and control systems, as well as their technical verification and design validation
- You select the electrical components, support their procurement and the preparation of the technical documentation
- You assemble the electrical equipment, integrate switchgear into test benches and assist with instrumentation, commissioning and maintenance
- Through your feedback, you actively and continuously participate in process improvement, troubleshoot, support root cause identification, and contribute to administrative tasks to develop and maintain the functionality of the TO team and its facilities

Your profile:

- Master craftsman or technician qualification as electronics technician for industrial, operational, or automation technology, a comparable education, or a degree in electrical engineering
- 3 years of present experience in this field is required. Additional experience with electrical systems up to 1 kV DC and high-power batteries for automotive applications is an advantage
- Knowledge and experience in the practical application of the Low Voltage Directive, the Machinery Directive and the corresponding electrical standards such as DIN EN 50191, DIN EN 61010-1, DIN EN 61439 or comparable standards of the electrical industry are an advantage
- Experience in sensor application and use (e.g. strain gauges, acceleration sensors, thermocouples, etc.) is a plus
- Knowledge of safety controls, their function and scope of application is appreciated
- Efficient use of standard IT software such as MS-Office and willingness to learn new software tools (e.g. databases) is essential. Additional experience in the use of E-PLAN is an advantage
- The ability to work in a team, a high sense of responsibility, manual dexterity and the ability to work on the basis of verbal and written instructions or complex technical documentation characterize you. We require a goal-oriented and motivated way of working with analytical, independent problem-solving skills to organize your own tasks
- Good written and spoken English skills are required, German skills are an advantage
- A drivers license class B (car) is required
- **Working on-site and submission of English resume is required**
