

Looking for a job?

With SimpleXX to your dream job - your path to success!

Systems Engineer - Airborne Electronics & Sensors (m/f/d) for Aviation

Start as Systems Engineer with us into a joint and successful future. As a specialist and personnel supplier for the aerospace industry for decades and in partnership with renowned companies in the aviation industry as well as aviation pioneers, SimpleXX GmbH is looking for a Systems Engineer - Airborne Electronics & Sensors for the Weßling site at the next possible date within the framework of temporary employment with a takeover option. You will apply system engineering development experience to lead the development, integration and verification of key sensors within the propulsion vectoring system. Furthermore, you will be responsible for Requirements management. Working for our client as an aviation company, you can expect challenging activities in an innovative working environment that is future-proof and offers you excellent career opportunities. Do you have a high level of self-motivation and the corresponding commitment? Does this appeal to you? Then apply for our job offer today. We look forward to receiving your application!

The following tasks await you:

- Apply system engineering development experience to lead the development, integration and verification of key sensors within the propulsion vectoring system
- Responsible for Requirements management
- Responsible for supplier liaison management
- Take ownership of the system and manage its whole development and verification activities
- Support the design, evaluation and perform data analysis of electronic sensors
- Work closely together with other departments (e.g safety, tests) and external suppliers
- Continuously improve tools and methods

Your profile:

- A university degree in Aerospace Engineering, Mechanical Engineering, Electronic Engineering, or a related field
- Working experience with airborne electronic hardware sensors development in aerospace or high reliability applications.
- Experience with SAEARP-4754A and RTCA DO-160G and familiarity with DO-254 and DO-178C
- Experience working with and managing external suppliers
- Good knowledge of regulatory material and certification requirements
- Experience with requirements management and their tools (e.g. Siemens Polarion)
- Experience in leading or completing verification activities is a plus
- Strong technical skills related to sensor technologies
- Strong documentation and clear reporting skills
- High level of self-reliance with the ability to work in a team, as well as autonomous
- A target-oriented, driven workstyle with analytic problem-solving skills
- Fluent English language skills, German or other languages are a plus
- Tools: Matlab Simulink
