

Looking for a job?

With SimpleXX to your dream job - your path to success!

Test Engineer – Propulsion (m/f/d) for Aviation

Start as a Test Engineer with us into a joint and successful future. As a specialist and personnel supplier for the aerospace industry for decades and in partnership with renowned companies in the aviation industry as well as aviation pioneers, SimpleXX GmbH is looking for a Test Engineer for Propulsion for the Weßling site at the next possible date within the framework of temporary employment with a takeover option. You will take on the review of the test request and the refinement together with the design team. Furthermore, you will be involved with the preparation of a test concept. Working for our client as an aviation company, you can expect challenging activities in an innovative working environment that is future-proof and offers you excellent career opportunities. Do you have a high level of self-motivation and the corresponding commitment? Does this appeal to you? Then apply for our job offer today. We look forward to receiving your application!

The following tasks await you:

- Review of the test request and refinement together with the design team
- Preparation of a test concept
- Detailed design of the test & measurement setup
- Coordination of technicians, suppliers, and other support teams
- Planning of the test execution, including test procedure and risk assessments
- Hands-on execution of the test
- Post-processing of the data and results reporting
- Create and review engineering documentation for our test setups and results
- Feedback your findings and opinion to the design team for product improvement
- Support resource and workload planning and coordination with interfacing teams
- Be a role model for a safe work environment in the laboratory

Your profile:

- A University degree in Aerospace Engineering, Electrical Engineering or related field (M.Sc/M.Eng preferred)
- Good knowledge and experience in propulsion testing, measurement methods, instrumentation, data analysis, post-processing and post-processing is required
- Good knowledge and experience in testing multi-kW electrical machines, CAD system (Siemens NX preferred) as well as processes, methods, and best practices of testing within the aerospace industry is beneficial
- Driven individual with the ability to probe and challenge assumptions
- Ability to work with incomplete requirements and to anticipate customer needs
- High level of self-reliance with the ability to work in a diverse team, as well as a target-oriented work style with analytic problem-solving skills is required
- Ability and willingness to thrive in a fast-paced, rapidly changing work environment
- Fluent English language skills are essential, fluent German or any other language is beneficial
- **Working on-site** (remote work possible) **and submission of English resume required**
