

Looking for a job?

With SimpleXX to your dream job - your path to success!

Test Engineer – Wind tunnel & Propulsion (m/f/d) for Aviation

Start as a Test Engineer with us into a joint and successful future. As a specialist and personnel supplier for the aerospace industry for decades and in partnership with renowned companies in the aviation industry as well as aviation pioneers, SimpleXX GmbH is looking for a Test Engineer for Wind tunnel & Propulsion for the Weßling site at the next possible date within the framework of temporary employment with a takeover option. You will review the test request and the refinement together with the design team. Furthermore, you will focus on wind tunnel testing, but you will also support other propulsion test campaigns if required. Working for our client as an aviation company, you can expect challenging activities in an innovative working environment that is future-proof and offers you excellent career opportunities. Do you have a high level of self-motivation and the corresponding commitment? Does this appeal to you? Then apply for our job offer today. We look forward to receiving your application!

The following tasks await you:

- Review of the test request and refinement together with the design team
- Focus on wind tunnel testing but not only, also support other propulsion test campaigns if required
- Preparation of a test concept
- Detailed design of the test & measurement setup
- Coordination of technicians, suppliers, and other support teams
- Planning of the test execution, including test procedure and risk assessments
- Hands-on execution of the test
- Post-processing of the data and results reporting
- Create and review engineering documentation for our test setups and results
- Feedback your findings and opinion to the design team for product improvement
- Support resource and workload planning and coordination with interfacing teams

Your profile:

- A University degree in Aerospace Engineering, Electrical Engineering or related field (M.Sc/M.Eng preferred)
- Good knowledge and experience in propulsion testing, measurement methods, instrumentation and windtunnel testing is required
- Good knowledge of data analysis and post-processing is required
- Good knowledge and experience in processes, methods, and best practices of testing within the aerospace industry is beneficial
- Good knowledge and experience in testing multi-kW electrical machines are beneficial
- Driven individual with the ability to probe and challenge assumptions
- High level of self-reliance with the ability to work in a diverse team, and a target-oriented work style with analytic problem-solving skills is required
- Fluent English language skills are essential, fluent German or any other language is beneficial
- Ability and willingness to travel to external facilities (in Germany, Switzerland & Netherlands) to support test execution (≈15% of the time)
- **Working on-site** (remote work possible) **and submission of English resume required**
